

BRUUSGAARD

Optimal safety. Minimal effort.

Bruusgaard Water Analysis

An onboard water testing solution

Onboard water testing has never been easier. With Bruusgaard Water Analysis, you can now perform testing and analysis of potable, ballast, sewage, cooling, and boiling water on board – to achieve both safety and compliance with ease.

With our brand-new concept, you can include up to five testing solutions in one cabinet to ensure improved test routines, efficiency, and tidiness – tailored to your vessel's operations.

Fewer components reduce waste and need for spares

Efficiency provides significant time and cost savings

The all-in-one cabinet vacates valuable space on board

A tidy and organized solution easily handled by the crew

Bill of Material

Instruments

- Multimeter (TDS / pH / Conductivity)
- Photometer
- Thermometer
- UV-meter
- Refractometer
- Colorimeter

Equipment

- Digestor Unit
- Comparator Unit with discs
- Turbidity Tube (TSS / COD / BOD)
- Operations Manual
- Logbook
- Video Support Package

Consumables

- Thio Bags
- Gloves
- Bottles, Vials & Petri Dishes
- Filters
- Syringes
- Dilution Pots

Microbiology

- Coliforms / E. coli
- Enterococci
- Heterotrophs
- Vibrio Cholerae
- Legionella
